About me

I have always been fascinated by how technology connects and powers the world around us, which led me to study Computer Science and start building my own coding projects. I am now looking for an apprenticeship where I can turn that curiosity into real industry experience and continue developing my technical skills. Alongside my passion for creating projects, I enjoy expanding my knowledge through online courses. I have also supported teachers and students as a Computer Science Assistant, helping others learn while strengthening my own understanding. I aim to use the skills and knowledge I've gained to build real industry experience, keep learning, and making meaningful contributions to a team.

Skills

Technical Skills

Python programming (created educational game *Planet Protectors*)
Software development fundamentals
Basic IT systems and troubleshooting (from teaching assistant experience)
Game development using Pygame
Problem-solving and debugging

Personal Skills

Strong communication and teamwork (teaching, events, and volunteering)
Time management and organisation (balancing school, projects, and volunteering)
Adaptability and quick learning (working in new environments like Doux Desserts & Exhibition Islam)
Initiative and responsibility (volunteer and trainee roles)
Attention to detail (IT setups, donation sorting, and project development)
Reliability and motivated attitude

Education

A-Levels

Mathematics – E
Computer Science – D
Business Studies – Distinction

GCSEs

Mathematics – Grade 7
Combined Science – Grade 6-5
English Language – Grade 5
English Literature – Grade 5
History – Grade 6
Computer Science – Grade 6
Business Studies – Distinction

Work Experience & Volunteering

Electrical Assistant/Shadowing – Electrician (November 2025 - January 2026)

J.R Building and Maintenance services limited

- Assisting with domestic electrical jobs, including preparing tools, organising materials, and maintaining a safe workspace.
- Supporting with basic tasks such as wiring preparation, fitting sockets/lights, and carrying out simple installations under supervision.
- Observing and learning electrical testing, fault-finding, and safe working practices in real on-site environments.

Computer Science Teaching Assistant (Volunteer) - (November 2024 - March 2025)

Shireland Collegiate Academy – Enrichment Programme | 1 hour/week

- Assisted teachers in supporting students during computer science lessons and extracurricular activities.
- Helped students with coding exercises and troubleshooting, strengthening both their understanding and my own.
- Contributed to setting up classroom materials and maintaining a supportive learning environment.

Computer Science Assistant (June 2024)

Shireland Collegiate Academy – Computer Science Department | 1-week placement (July 2023)

- Supported teachers and students during lessons and classroom activities.
- Assisted with lesson preparation, admin tasks, and basic IT setups.
- Developed strong communication, teamwork, and time management skills.
- Gained practical experience working collaboratively in an educational environment.

Trainee (November 2023 - December 2023)

Doux Desserts | 1-month training

- Gained hands-on experience in customer service, food preparation, and working in a fast-paced environment.
- Learned practical time management and teamwork skills in a retail setting.

Event Support (September 2023 - November 2023)

Exhibition Islam | Various events

- Helped set up and manage events at different locations, including logistics and assisting attendees.
- Developed organisational, communication, and problem-solving skills while working in team environments.

Projects & Achievements

Developed an educational game, *Planet Protectors*, using Python and Pygame to teach children about environmental protection through quizzes, hints, and interactive features. (Portfolio for this project is available upon request)

Completed the online course *An Introduction to Software Development*, gaining insight into software engineering principles.

Completed a Python programming course and continued expanding coding knowledge by exploring additional programming languages.

Completed the National Citizen Service (NCS) programme, earning a certificate through team challenges, skills workshops, and delivering a community project.
